ABOUT ME

I am a recent PhD graduate in Mechanical Engineering from the University of Michigan. My doctoral research used human pluripotent stem cell models to study early human development, where I combine bench experiments with image quantification and statistical analysis in Python, R, and Matlab. I am broadly interested in research that bridges experimental biology with computational modeling.

RESEARCH INTERESTS

- Computational and data-driven modeling of biological systems
- Integrating *in vitro* experiments with *in silico* models
- Quantitative approaches to human health and disease

EDUCATION

University of Michigan, Ann Arbor 2026

Ph.D. in Mechanical Engineering, GPA: 4.0 / 4.0

Advisor: Prof. [Jianping Fu](#)

Thesis:

hPSC-Based Modeling of Human Embryonic Development via Acoustic and Microfluidic Approaches

University of Toronto 2021

M.A.Sc. in Mechanical Engineering, GPA: 3.9 / 4.0

Advisor: Prof. [Xinyu Liu](#)

Thesis: An Improved Approach for Optogenetic Locomotion Control of *Caenorhabditis Elegans*

Hong Kong University of Science and Technology 2019

B.Eng. in Mechanical Engineering

Dean's List, First Class Honours

SELECTED RESEARCH EXPERIENCE

Synthetic 3D hPSC Models on Peri-Implantation Development 2021 - 2026

Supervisor: Prof. Jianping Fu

University of Michigan

- Developed microfluidic-based biomimetic substrates for 3D hPSC organoid culture to study early human embryo development.
- Led the execution of three projects, resulting in publications [1] [8] [10].

Neural Differentiation of hPSCs via Acoustic Tweezing Cytometry 2022 - 2024

Supervisors: Prof. Jianping Fu, Prof. Cheri X. Deng

University of Michigan

- Utilized acoustic tweezing cytometry technology to study mechanosensitive properties of hPSCs
- Achieved scalable and reproducible production of functional motor neurons for medical applications.
- Received support from NIH R01 grant (GM143297), resulting in publications [4] [9].

- Facilitated the development of a living soft microrobot - RoboWorm (optogenetic *C. elegans* controllable by microfluidic tools), resulted in a highly-cited publication [5].
- Improved protocol success rate from 7.1% to 80.77% by creating a new transgenic worm strain and enhancing control system robustness.

HONORS AND AWARDS

2024	8th Bioengineering and Translational Medicine Conference	Young Investigator Award
2021-23	UMich Rackham Travel Grant	USD 2,150
2021	UMich ME Department Fellowship	USD 89,775
2019-21	UofT MIE Department Fellowship	Full Scholarship
2021	UofT Barbara and Frank Milligan Fellowships	CAD 10,000
2020	UofT MIE Endowed Fellowship	CAD 3,000
2019	HKUST President’s Cup	Gold Award
2018	HKSAR Government Talent Development Scholarship	HKD 10,000
2016	HKUST Robot Design Contest	Champion
2013	China National Awarding Program of Future Scientists	Top 100
2009	China Arts Grade Examination - Piano, Grade 10	Top Level

TEACHING EXPERIENCE

ME 335 Heat Transfer Winter 2026
Graduate Student Instructor - 93 students *University of Michigan*

- Facilitated and coordinated the delivery of lectures.
- Designed and held course recitation sessions.

ME 495 Laboratory II Fall 2025
Graduate Student Instructor - 24 students *University of Michigan*

- Developed lab sessions for a senior-level lab course.
- Closely mentored students in both theoretical knowledge and practical experimental skills.
- Topics included heat transfer, mechanical dynamics, and AFM-based nanoscale metrology.

MIE 342 Circuits with Applications to Mechanical Engineering Systems Fall 2020
Teaching Assistant - 130 students *University of Toronto*

- Led a four-person TA team to support a lab course on circuit.
- Co-developed online laboratory tools for remote instruction during COVID-19, enabling virtual circuit assembly and experimental data acquisition.

PROFESSIONAL DEVELOPMENT

Rackham–CRLT Preparing Future Faculty Seminar 2026
 University of Michigan, Center for Research on Learning and Teaching (Certificate)

STUDENT MENTORING

Linyuan Li

B.S. Student in Biochemistry

Jun. 2025 – Sep. 2025

University of Michigan

- Mechanical regulation of zebrafish PSM cells using geometrically modulated elastomeric substrates.

Ruxin Yang

M.S. Student in Biomedical Engineering

Aug. 2024 – Sep. 2025

University of Michigan

- Acoustic cell patterning.

PROFESSIONAL SERVICE

Journal Reviewers: Nature, Cell Stem Cell

SKILLS

Biology: Cell Culture • Immunostaining • Microscopy • qPCR • Single-cell RNA Sequencing

Manufacturing: Microfluidics • Microfabrication • 3D Printing/Bioprinting

Quantitative Analysis: Python • R • Matlab

Illustration: ImageJ • Adobe Photoshop • Adobe Illustrator • Procreate

Languages: English • Mandarin • Cantonese
